SWAB TEST
RESULTS**

Key Features and Benefits:

- Intuitive 'one-click' interface streamlines inspection process
- Easy import of lab and swab test results, with integrated analytics
- Track equipment, deficiencies, corrective actions, and operator performance
- Secure electronic inspection reports streamline audits
- Mobile-friendly design; access anywhere
- Analytics to drive quality and continuous improvement

Streamline Inspections. Gain Insights to Improve Safety, Quality, and Efficiency

With Vigilistics new InspectionPro™ you can use a PC, tablet or smart phone to capture your entire inspection process electronically and securely, with reporting and analytics that can help drive continuous improvement.

InspectionPro integrates lab and swab test results — including Hygiena, Charm Sciences, others — with cleaning data to create a comprehensive picture of your sanitation process.

InspectionPro automatically stores secure, electronic records of each and every inspection performed. These reports are sortable by production line and date range, making audit compliance as simple as clicking a button.

Advanced analytics provide transparency into how well individual lines, units and operators are performing, to assist with scheduling and overall efficiency analysis.

SOLUTION OVERVIEW

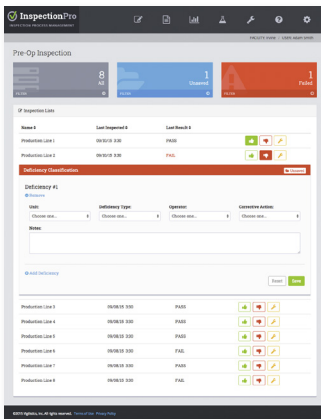

Analyze trends and insights

- Know your Efficiency rating
- Monitor pass rate by production line
- Track deficiencies by source
- Evaluate performance of lines, units, operators

Intuitive inspection interface, with easy 'one-click' touch controls optimized for tablets and mobile devices

- Easy-to-use one-button Pass/Fail
- Customized to your facility
- Mobile-friendly design

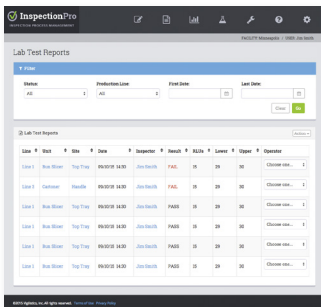

Easy to capture and track deficiencies

- Associates proper units for each line
- Automatic prompt for deficiency type
- Automatic prompt for corrective action
- Automatic prompt for operator name

Lab and swab test results import

- Import lab and swab test results from Hygiena, others
- Track failed swab tests by production line, operator, date
- Easily add operator name to reports

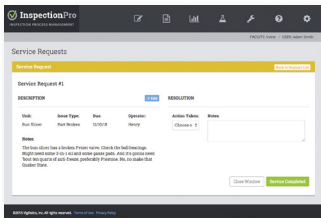

Corrective Action notification system

- Create, assign, track repairs and corrective actions
- Associates proper units for each line
- Auto-prompt for unit, required service, schedule, operator
- Notification via email, text

Secure electronic inspection reports

- Filter by status, date, operator, and more
- Secure archive ideal for audits and compliance reporting
- Print-ready format (PDF)
- Export to Excel, CSV, PDF, more

About Vigilistics

Vigilistics helps leading food and beverage companies collect and analyze process-level data. Our solutions allow organizations to cost-effectively meet FDA compliance regulations, gain transparency into every step of the manufacturing process, and to drive consistency, efficiency and quality across the organization.
