

SanitizationPro™

Key Results:

- Data-driven process improvement
- Minimize CIP Time
- Maximize Safety
- Real-time monitoring
- Optimize CIP costs
- FDA Validated compliance reporting

Unparalleled Insight into Your CIP Process

Providing visibility from the plant floor to the corporate office, Vigilistics' SanitizationPro™ monitors every step of every wash. Automated data collection generates wash records in real-time using benchmarks, baselines, dashboards, alerts and exception reporting to drive consistency, quality and cost reduction. Set up prediction based rules to provide early warnings, or action limits, in advance of exceeding a legal compliance or quality violation.

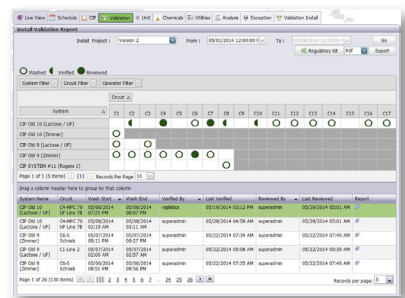

FDA-Validated Compliance Reporting

And when the process is complete, SanitizationPro allows you to access FDA validated compliance reporting when and where you need it, with automatic backup, filter, search and sort delivered with the latest in mobility.

SOLUTION OVERVIEW

Wash Reports for every CIP with trend reports configured to your needs: Wash Program, Wash Duration, Exceptions, Titrations and verifier/ reviewer signoff.

FDA Validated paperless compliance reporting. Manage critical information such as titration, exceptions, root cause and resolution with your wash and unit inspection records.

Dashboards provide transparency into things like wash duration, exceptions, operator performance and overall plant efficiency, optimizing chemical & utility consumption and cost.

Data driven continuous process improvement

- Minimize, Maximize & Optimize manufacturing operations
- Search, Analyze, Present and Report

Minimize CIP Time

- Increased Availability for Production
- Reduce downtime using root cause analysis and corrective actions.
- Trend analysis to identify deficiencies in problem areas
- Reduce time lost for re-cleaning and sanitizing with actionable, visual data points in live view mode

Maximize Safety

- Monitor (MCO) maximum continuous operating time
- Prevent recalls by managing THD (time held dirty), THC (time held clean), TBW (time between washes) to meet regulatory compliance

Optimize CIP Cost

- Monitor your QA and sanitation program step-by-step
- Optimize chemical and utility consumption and cost
- Track improvement
- Alerts and Automated Reporting

Real-time monitoring

- Live monitoring and CIP optimization using visual indicators
- Visualize the quality & sanitation program, track problem areas and resolution
- Be preemptive rather than reactive
- Demonstrate ROI for process improvement

FDA Validated compliance reporting

- Paperless System for Analysis, Reporting and Compliance with Regulatory Requirements
- Automated regulatory kit generation for every inspection
